Executive Summary

Development Standards & Practices Used

List all standard circuit, hardware, software practices used in this project. List all the Engineering standards that apply to this project that were considered.

Summary of Requirements

- Determine limitations of APIs available for interpreted languages, and what is useable for potential knowledge of other code running
- Using the limitations, the data valuable and useable in the creation of machine learning models to analyze data from functions
- Attack code that collects data, then uses a machine learning model to classify the recorded data
- If possible, using this classified data, analyze potential leaked information from other serverless functions running at the same time
- If leakage is found, report through the proper channels to get the vulnerability fixed
- Created a formal detailed analysis of our findings, in a presentable manner

Applicable Courses from Iowa State University Curriculum

- Com S 227, 228, 309
- Cpr E 437x
- Cpr E 381
- Cyb E 230, 231, 331
- CpR E 308

New Skills/Knowledge acquired that was not taught in courses

- Knowledge about cloud computing, specifically relating to serverless functions.
- Understanding of different virtualization types, and how they interact

1.1 TEAM MEMBERS

MICHAEL GOHR

DILLON HACKER

CAMERON HURT

SAMUEL POTTER

TRENT WALRAVEN

1.2 REQUIRED SKILL SETS FOR YOUR PROJECT

- AWS Serverless Functions
- Virtualization
- Coding
- Data Analysis
- Communication
- Security Knowledge

1.3 SKILL SETS COVERED BY THE TEAM

- Internal communication
- Task scheduling
- Coding
- Virtualization
- Security Knowledge

1.4 PROJECT MANAGEMENT STYLE ADOPTED BY THE TEAM

- Agile methodology (frequent meetings, achievable smaller tasks/deliverables between them)

1.5 INITIAL PROJECT MANAGEMENT ROLES

Micheal Gohr: Team organization and individual component design

Dillon Hacker - Client interaction, note taking/meeting minutes, and testing.

Cameron Hurt - Oversee testing, and ensure coverage

Trent Walraven - Meeting coordination and record keeping when needed

Samuel Potter - Component creation coordinator, documentation creation
